BNMS-50 Mini Mixing Station Parts Manual

The BNMS-50 portable 5-gallon mixer is easy to setup and operate. The perfect accessory for those smaller mixing jobs.

The bucket locking system prevents bucket spinning during mixing and the bucket can be easily removed and ready to pour.

When used with the BNR6400 mixer, the coatings can be mixed hands free for timed mixes. This stand is light weight and folds together to be carried like a suit case.

- The stand should be placed on a level dry surface. Uneven surfaces can cause the mixer stand to fall.
- Adjustable legs provide easy leveling.
- For safety, loose clothing should be removed so that it does not get caught in any of the moving parts.
- A proper three prong electrical socket should be used with any mixer to prevent electrical shock.
- Gloves and eye protection must be used when operating this equipment.
- A dust mask should be worn to prevent breathing in dust particles that can be harmful.
