Concrete Form Tools

BNFTSP and BNFTSPN Stake Puller

Designed to easily remove 3/4 inch round and square stakes. Harden rollers will grip the stake firmly. Handles provide excellent torque when using a twisting motion. Twisting the tool back at forth will loosen the stake and the handles make it easy to pull the stake out of the ground. Available with either a belt clip (BNFTSP) or a duplex nail puller (BNFTSPN).

BNFTSH Safety Stake Holder

Safely pound stakes without having to hold the stake. Spring loaded head that allows for secure gripping of 3/4 inch round and square stakes. Tool can pick up stakes from the ground and will hold it away from the user's hand during the installation of the stake. Significantly reduces hand injuries.

BNFTSA Stake Stryker

Protects both the stake and the user from damage or injury. Provides full kinetic transfer of force from the hammer to the stake. The expanded head affords a larger striking surface reducing "Miss Hits". Protects the striking surface of the stake from breaking down. Keeps hands away from the stake during installation thus reducing job site injury.

BNFTNP Nail Puller

Easily remove duplex nails from stakes and forms. The handle and grip design provide exceptional leverage. The length of the handle reduces strain from bending and pulling. The curved head allows for nails to be pulled out straight so they can be reused.
